huysam319

## Summary

I have over 6 months of experience in Backend Development, including 4 months of experience in Spring Boot Backend Development and 3 months in Node.js technology.

I aim to gain knowledge and hands-on experience in backend development in order to become a skilled and professional backend developer.

## Soft skills

- Problem-solving
- Teamwork & Collaboration
- Time management
- Curiosity & Willingness to learn
- Ability to comprehend documents and communicate in English.

## Education

Ho Chi Minh City University of Technology  
(Vietnam National University, Ho Chi Minh City)

2022 - 2026 (Expected)

### Computer Science

Junior student

Current GPA: 3.6/4.0

### University scholarship

For excellent achievement in academic semesters: Semester 1 and 4.

English: TOEIC 860

## Work experience

### Coin price tracking system

Sep-Dec 2024

- Link Github: <https://github.com/dath-241/coin-price-be-java>
- Number of members: 7
- Backend: Spring Boot
- Database: MongoDB
- Main features:
  - + Look up cryptocurrency prices from Binance
  - + Calculate popular indicators (SMA, EMA, BOLL) from CoinGecKo
  - + Set up price and indicator alerts based on trigger conditions

### Student Smart Printing Service

April 2025

- Link Github: <https://github.com/huysam319/smart-printing>
- Number of members: 1 (personal project)
- Backend: Node.js
- Database: MySQL (using Sequelize to connect with database)
- Frontend: ReactJS
- Main features:
  - + CRUD users, printers
  - + Upload and print documents
  - + View the user's and the printer's printing log.

### Ecommerce TechSphere

Feb 2025 - Now

- Link Github: <https://github.com/huysam319/e-commerce>
- Number of members: 10 (3 members in backend team)
- Backend: Spring Boot
- Database: MySQL
- Main features:
  - + CRUD users, products
  - + Manage users' cart and orders
  - + Integrate a payment gateway

## Technical skills

- Familiarity with APIs and backend technologies: Java (Spring), Node.js
- Database systems: SQL and NoSQL
- Familiarity with Git and ability to use Docker for CI/CD.
- Using Jira and Confluence for project management, task tracking, and documentation.
- Using Behance to present project showcase, including a demo prototype.
